

LEGEND

- SA / SO central control points
- Example path of event monitoring & remote control
- remote control

The diagram illustrates a network architecture for SA/SO central control points. It features a 'Satellite' at the top, connected via dashed lines (labeled 60) to a 'Tactical link' (labeled 70). The 'Tactical link' connects to a 'Subordinate Net' (labeled 20), which is represented by a star shape. Within the 'Subordinate Net', there are several vehicle icons (labeled 30) and a 'Ble XO' icon (labeled 40). A 'Legend' at the bottom explains the symbols: a star represents 'SA / SO central control points', a dashed line represents 'Example path of event monitoring & remote control', and a double-headed arrow represents 'remote control'. The diagram also includes a 'Tactical link' (labeled 70) and a 'Subordinate Net' (labeled 20).
